O-G-Y.

TECH SONGS.

No. 1.

THE STEIN SONG.

Words by R. Hovey.
Music by F. F. Bullard 1887.

Give a rouse then in the May-time,
For a life that knows no fear!
Turn night-time into day-time
With the sunlight of good cheer!
For its always fair weather
When good fellows get together,
With a Stein on the table
And a good song ringing clear.

Chorus.

For it's always fair weather
When good fellows get together,
With a Stein on the table
And a good song ringing clear.

Oh! we're all frank and twenty
When the spring is in the air;
And we've faith and hope a-plenty
And we've life and love to spare;
And it's birds of a feather
When good fellows get together,
With a Stein on the table
And a heart without a care.

Chorus.

And it's birds of a feather,
When good fellows get together,
With a Stein on the table
And a heart without a care.

No. 2.

DEAR OLD M. I. T.

Words and Music by H. S. Wonson 1907.

The sun with glowing crimson
Has ting'd the sky's dull gray,
The glory of the sunset
Uplifts our flag today;
While here beneath our colors,
With hearts that never yield,
Our boys are fighting onward,
Fighting onward 'cross the field.

Chorus.

Fight on boys, we are cheering for you,
For we want you to win today;
Do your best, we are all behind you,
And you're wearing the Red and Gray.
Though the odds may be great against
you,
Full of sturdy courage be;
And we'll raise a song of vict'ry
For dear old M. I. T.

Before old Harvard's crimson,
Before the rows of Brown,
Before the green of Dartmouth,
Our colors will not down.
Though Amherst's white and purple
Bid the Red and Gray to yield,
Our cheer still strong and clear
Will ring across the field.

Chorus.

On the days that are before us,
We will gather as of yore,
And raise in swelling chorus.
The grand old cheer once more.
And when the battle's over,
Then at the close of day,
Once again we'll raise our colors,
Victory crowns the Red and Gray.

Chorus.

No. 3.

TAKE ME BACK TO TECH.

Words by L. W. Litchfield 1885.
Air: "Solomon Levi."

I wish that I were back again
At the Tech on Boylston Street,
Dress'd in my dinky uniform,
So dapper and so neat;
I'm crazy after calculus;
I never had enough,
It was hard to be dragged away so
young,
It was horribly, awfully tough!

Oh, give me some 'Ology,
'Ology, tra-la-la-la!
Any old kind of 'Ology!
Tra-la-la-la-la-la!
La-la-la-la.

Refrain.

Take me back on a special train,
To the glorious Institute;
I yearn for the inspiration
Of a Technological Toot!
I'd shun the physical, quizzical Prof.
And chapel, and all that;
But how I would love again to go
On a Scientific Bat!

Oh, back to the days that were free
from care,
In the 'Ology Varsity shop.
With nothing to do but analyze air
In an anemometrical top;
Or the differentiation
Of the trigonometrical pow'r's
Of the constant pi that made me sigh
In those happy days of ours.

Rah for Technology,
'Ology, 'Ology, oh!
Glorious old Technology!
'Ology, 'Ology, 'Ology!

Refrain.

No. 4.

THE CARDINAL AND THE GRAY.

Words by G. H. Bryant 1907.

Music by H. L. Moody 1907.

The team is out, all sing and shout,
We'll show them how to win;
The men are strong, the cattie long.
And now they're digging in.
So shout and cheer and let them hear
That Tech is with them now.
Cheer Tech! Cheer Tech!
Cheer for victory.

Chorus.

Three cheers for Tech!
Our lay will surely win the day;
All shout and sing
For the Cardinal and the Gray.
With every "T" let your voice and spirit
be;
Fight with all your might
And give to Tech the victory.
Rah! Rah! Rah!

(Repeat Chorus.)

When Tech is out, we all will shout,
And loudly we will cheer;
Our colors high will ever fly,
Our voices all will hear;
For Tech is best and all the rest
Will soon be left behind.
Cheer Tech! Cheer Tech!
Cheer for the victory.

Chorus.

T. C. A. HOLDS TECH UNION RECEPTION

Activities All Outline Plans For Coming Events of The Year

INSTITUTE COMMITTEE STARTS THE YEAR

Passes Many Important Measures Regarding Funds of Tech Show, 1910

One hundred and fifty men listened to the addresses of the various student interests made last night in the Union at the Technology Christian Association reception to new men.

W. W. Warner 1911, president of the Christian Association, introduced each speaker with little comments of his own that, coming from one not in the activities, was particularly interesting to the guests and their speakers.

The first of the speeches were largely athletic. Coach Kanaly started the talks with a discussion of the new gymnasium and field plans. He outlined the scheme of points on contests, a more detailed account of which will be given later. He also announced the new DuPont cup, a replica of which is to be given to the man with the largest number of points each year. The original will be inscribed each year with the name, class, and points of the winner.

Among the others who spoke regarding athletics was Captain Salisbury 1911 of the track team, who did more than hint at the fellows' activities in athletics, and who also urged the subscription to athletics in the season ticket. Captain Parker 1911, of the basket-ball team, outlined his hopes for the future and suggested what had been done in the past in the way of upholding the name of the Institute in that line. Coach Kanaly again talked on athletics, but this time it was the cross-country work, which as given in another column today, starts this afternoon.

I. W. Wilson 1911, general manager of The Tech Show 1911, then opened the talk of the inside Institute organizations. He pointed out that although his activity was not exactly classed under athletics, he believed that among its many other fields it might be considered as highly strenuous when it came to dancing and chorus work in particular. He told about the three lines of Stage, Publicity, and Business in the active Show work, and also hoped many others would assist on the lyrics, songs and plots for the coming Show in April.

General Manager Caldwell 1911 of the Combined Musical Clubs then gave an interesting account of what that activity had done in the past and what it was planning in the future. The biggest thing ever attempted by the clubs was their western trip last spring vacation, which was so eminently successful, due to the untiring effort of W. W. Warner 1911, who was then the manager.

R. H. Ranger 1911, general manager of The Tech, then gave a talk on the plan of getting out the paper at 8.30 instead of eleven A. M. It has always been the ideal of the various Tech boards to give the Institute a paper best suited to its needs, and by oft-repeated suggestion that it come out before classes, this year's board is bending all efforts to such an accomplishment. This is being done even at a sacrifice of a few of these first issues, necessitated by the change of arrangements.

Editor-in-chief Keobon of the coming Technique 1912 also urged the financial and active assistance in their efforts for the coming year. Although this year book is primarily the work of the Junior class, it cannot be a success unless the other classes lend great assistance in the way of subscribing, ad. getting, grind collection, and art work.

Then W. W. Warner outlined the main endeavors of the T. C. A. in his

At the first meeting of the Institute Committee this year, held yesterday afternoon, considerable business of definite interest to the undergraduate body of Technology was transacted.

The Tech Show management was authorized to turn over to the Institute Athletic Association the sum of \$450 to be used as the Advisory Council on athletics shall direct, and thirty dollars from the same source was allowed the Tech for use in publication of the Institute Daily.

The present unfortunate lack of drinking cups and tanks, made necessary by the enforcement of the recent Massachusetts State law, was discussed, and a committee composed of I. W. Wilson 1911 and W. N. Holmes 1913 was appointed to consult with Bursar Rand and to offer suggestions as to the placing of the new bubblers, the gift of Mr. S. C. Keith.

Plans were made for the distribution of the booklets descriptive of undergraduate life, "Concerning the Institute of Technology," to those of the Freshman class who desire them. R. H. Ranger 1911 and H. D. Peck 1913 will be on the distribution committee. Freshmen who desire these books may see copies of them in the Union. The books will be given free to freshmen who leave their names and addresses at the cage. It is hoped that freshmen after reading these books, will send them to prospective students or friends who wish to learn about Technology.

H. D. Peck 1913, of the Bulletin Board Committee spoke of the present deplorable appearance of the bulletin boards. Definite action was deferred until the election of the new Institute Committee.

The secretary of the Institute Committee was asked to post notices to the effect that it is desired that undergraduates shall not wear prep. school letters or insignia either at the Field or around the Institute. This is an old custom, and all new men are expected to conform to it. Prep school sweaters or jerseys may be worn inside out, or with the letters on the back.

R. H. Ranger 1911, general manager of The Tech, asked the members of the committee to spread the news that the Tech is in financial straits, and to push the subscription book idea.

Pres. Copeland requested that plans for class elections be put under way at once.

The next meeting of the committee will be held Wed., Oct. 12.

introduction to G. W. Tupper, prominent in the Y. M. C. A. work of the lower New England States. Mr. Tupper pointed out the actual necessity of this work in our present day society and suggested that right in college could be planted the seed which would germinate into successful work in after life.

The evening was then concluded on the upper floor in Union living rooms by refreshments and very good cheering and singing. That famous old Y. M. C. A. tag stunt was here used to the utmost in getting the fellows together socially.

BOSTON, MASS., OCTOBER 1, 1910.

Tonight the freshmen start their life as a class at the Institute. Of course the freshman-sophomore idea has not as yet faded out, and a few will think it devolves upon them to be as disagreeable as they can. But the custom is but short-lived, and as it has and is dying out in other up-to-date institutions, it is so doing here. This occasion not at all the place for any mix-ups of classes. The time for this time has been set aside for Field Day when the fair-and-square ideal of equal sides and equal chances is given both classes to show what is in them.

Why not be the starters of the idea of same class rivalry? Who has ever relished these childish antics that bring us before the attention of our supporting public in a very unfavorable light?

The T. C. A. has again shown its worth by the able handling of the reception to new men and by the publication of the annual Tech hand-book. The latter in particular was welcomed yesterday by those men who have realized from past years the handiness of these little books.

PRESIDENT MACLAURIN

(Continued from page 1.)
pressure, so important for the successful aviator to solve, are here dealt with scientifically.

Particular Interest for Tech.

Progress in the field of aviation is of particular interest to us here at Technology, considering as we are the establishment of a course of study largely along the lines of the National physical laboratory for the study of aviation. The committee of alumni appointed for the purpose suggested that work be undertaken along the lines mentioned, and this undoubtedly would have been put into effect were it not for the matter of expense. Not that we do not deem this an important subject, but there are many other things which must be successfully carried on first.

"I was very glad to see Mr. Grahame-White in action on two occasions, and I also saw nearly all of the famed aviators from France and the continent at one time or another. I also

was unfortunate enough to witness the untimely death of aviator Rolles. He had been a staunch college friend of mine and had interested me greatly in his work.

"Indeed, what struck me as particularly noteworthy was the interest in aviation taken by the country at large. The people there do not regard aviation merely as a fad, but as an important branch of science, particularly the military people. I imagine that in our country the advancement of aviation in the next few years will be made largely by the government along military lines.

Tech Men on The Cymric.

"On my homeward journey on the Cymric I was particularly interested in a number of Tech men who had been abroad all summer. These young men who had worked their way over on a cattle boat seemed to me to have done a fine, sensible thing. That little trip, costing them but little, is undoubtedly one of the most valuable parts of their whole education.

"There were also a number of Institute graduates on the Cymric, and I enjoyed frequent chats with them immensely. Professor Despradelle of the architectural department was also on board.

"Just a word about the local customs office. I have heard so much about the courtesy of customs officials—not here, but in other parts of the country—that I was greatly pleased with the treatment accorded us by the local officers. None of that disagreeable attitude, which I know by experience exists elsewhere, notably New York, was evident. They did their duty quickly and with as little bother as possible. One thing struck me, however, as it must strike all who pass through the local office, and that is the lack of proper facilities."

Warming to Tech Crew.

When questioned regarding the Tech crew, Dr. MacLaurin said, "I hope that the men on the crew will not lose their heads. Their resources are limited and they should not think that they can compete with Yale, Cornell, Harvard and the big colleges who have been in this kind of work for years and have unlimited funds at their disposal. However, if the men will take the work coolly it will be of great benefit to them. The usual trouble with youth is over-ambition. What the Tech crew wants to do is to go at things easily for a while.

"Technology is today in a very critical stage. The real problem which we have to face is the problem of finances. The Institute is a school of great traditions and it has gained the respect of the country. But we must patiently wait until the people realize the importance of a higher education of our kind and lend financial aid.

"England, while not generally regarded as a progressive nation, has the double advantage of a wonderful geographical position and excellent natural resources. On the other hand our own state of Massachusetts has no great natural resources, and so if we desire to keep abreast of the times we can only do so by the development of highly trained minds.

"The best machine is a trained intelligence. Certainly there must be many industries here in Massachusetts that might be developed if we had men able to develop them. It is only by such a realization of the value of a technical training that Germany became such a power in the commercial world today. The people of Massachusetts stood by Technology faithfully during the early years of its progress, but today they seem to ignore the fact that the type of education pursued by Technology is necessarily very costly."

SOPHOMORE FOOTBALL

"Tommy" Matters Rejoins Team
As Coach

Work has begun in earnest by the sophomore football squad under the direction of Captain Eichorn. Every night now the fellows practice at the oval and the men are kept hard at work for an hour or so. Manager Fallon, the star quarterback of last year's team has arranged an attractive schedule for the season.

Great joy was shown by the squad at the arrival of coach "Tommy" Matters in the oval just before the close of last night's practice. Matters has again been engaged to coach the fellows and this means that the team will develop rapidly in the next few days.

The season opens next Tuesday when a game will be played with the High school of Commerce team on the American League grounds on Huntington avenue. Games have also been arranged with Pomfret school, Somerville, Lowell Textile, Boston Latin, Dean Academy and the freshmen games are pending with Salem and Beverly.

The complete schedule follows:

Oct. 4.—High school of Commerce at American League grounds.

Oct. 8.—Open.

Oct. 12.—Pomfret school at Pomfret, Conn.

Oct. 15.—Somerville High at Somerville.

Oct. 19.—Boston Latin at Tech Field.

Oct. 22.—Dean Academy at Franklin.

Oct. 26.—Open.

Oct. 29.—Lowell Textile at Lowell.

Nov. 4.—Freshmen at Tech Field.

not necessarily mean that sweaters and jerseys are to be given up, but that, if such sweaters or jerseys be worn, they should be worn wrong side out or with the insignia on the back. The Institute Committee expects all freshmen and new men shall conform with this custom the present school year.

Very Truly.

ARCH EICHER.
Sec. Institute Com.

TECH CREW

The purpose of the work this fall is to interest the candidates, particularly new men, and keep them in training. An effort will be made to develop the men individually, rather than as a crew.

Financially, the crew's prospects are very hopeful. The Alumni seem to be interested in rowing, and, while they have not yet contributed enough to put the crew on a firm financial footing, indications point to the probability of a crew next spring. The Chicago Alumni have promised to help out, but the amount has not been announced.

Coach Wm. O'Leary has been retained and crew practice will be held every day at the Union B. C. at 4.30. The following men reported for practice yesterday:

Capt. W. N. Gere, 1912; G. Hershoff, 1912; W. M. Ruby, 1912; I. W. Pinnock, 1913; H. C. Frisbee, 1911; E. B. Wittengil, 1912; H. J. Jenks, 1911; E. O. Upham, 1912; H. A. Babcock, 1912; J. E. Whittlesey, 1912; K. C. McKenney, 1912; E. D. Hayward, 1914; C. W. Hale, 1913; R. G. Adams, 1911; E. C. Gere,

COMMUNICATION.

To the Editor of The Tech:

It has been a custom at the Institute for years that freshmen coming from colleges, preparatory and high schools, should cast aside any insignia on sweaters, jersey caps, etc., which they may have even in former years. This does
